

# Tractor Loader buckets

All our Loader buckets are manufactured in house in our own workshop in the UK using quality materials to the highest standards

All our buckets are manufactured with 150mm x 20mm (6" x 3/4") 270HB Boron cuttings edges, 10mm leading edges on the side plates and wear ribs on the floor as standard.

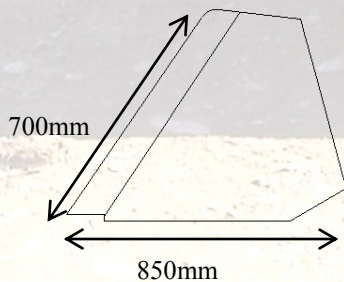

All are supplied complete with brackets and we can manufacture them to fit the majority of tractor loaders inc. Quicke, Trima, Chilton, MF etc

72" Tractor loader shovel

We offer 2 sizes of loading buckets for tractor loaders available in widths from 48" to 96" wide

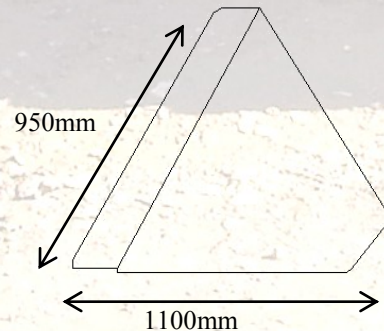

### Standard
